Dear Mr. Arnett and Ms Markesteyn:

Thank you for your letter of October 1, 2010. I am very pleased to hear about the progress that has been made in establishing a collaborative foundation for the discussions between your organizations on the issues of use of title, scope of practice and requirements for independent practice for school psychologists in all practice settings.

Based on this progress, I can advise that we are willing to allow you to continue your renewed discussions on the outstanding issues. If consensus on the outstanding issues can be achieved by January 31, 2011, referral to the Health Professions Advisory Council should not be necessary.

Sincerely,

Milton Sussman
